Accordingly, MAT credit has been recognized, wherever applicable on the date of balance sheet which can be carried forward for the period of ten year from the year of recognition.

Deferred Tax:

Deferred tax assets and liabilities are recognized for the future tax consequences attributed to timing differences that result between profit offered for income taxes and the profit as per the financial statements.

Deferred tax assets and liabilities are measured using the tax rate and tax laws that have been enacted or substantively enacted by the balance sheet date. The effect on deferred tax assets and liabilities of changes in tax rates is recognized in the period that includes the enactment / substantive enactment date.

Deferred tax assets on timing differences are recognized only if there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. However, deferred tax assets on the timing difference when unabsorbed depreciation and losses carried forward exist, are recognized only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized.

Deferred tax assets are reassessed for the appropriateness of their respective carrying amounts at each balance sheet date.
